

# Masoneilan™ SVI™ 3

Advanced Performance Digital  
Positioner Bench Quick Start  
Instruction Manual (Rev A)

## About this Guide

This instruction manual applies to the following instruments and approved software:

- SVI3
  - SVI3 DTM version 3.10 or later
  - ValVue 3.60 or later

The information contained in this manual, in whole or part, shall not be transcribed or copied without Baker Hughes' written permission.

In no case does this manual guarantee the merchantability of the positioner or the software or its adaptability to a specific client needs. Please report any errors or questions about the information in this manual to your local supplier or visit [valves.bakerhughes.com](http://valves.bakerhughes.com).

## DISCLAIMER

**THESE INSTRUCTIONS PROVIDE THE CUSTOMER/OPERATOR WITH IMPORTANT PROJECT-SPECIFIC REFERENCE INFORMATION IN ADDITION TO THE CUSTOMER/OPERATOR'S NORMAL OPERATION AND MAINTENANCE PROCEDURES. SINCE OPERATION AND MAINTENANCE PHILOSOPHIES VARY, BAKER HUGHES COMPANY (AND ITS SUBSIDIARIES AND AFFILIATES) DOES NOT ATTEMPT TO DICTATE SPECIFIC PROCEDURES, BUT TO PROVIDE BASIC LIMITATIONS AND REQUIREMENTS CREATED BY THE TYPE OF EQUIPMENT PROVIDED.**

**THESE INSTRUCTIONS ASSUME THAT OPERATORS ALREADY HAVE A GENERAL UNDERSTANDING OF THE REQUIREMENTS FOR SAFE OPERATION OF MECHANICAL AND ELECTRICAL EQUIPMENT IN POTENTIALLY HAZARDOUS ENVIRONMENTS. THEREFORE, THESE INSTRUCTIONS SHOULD BE INTERPRETED AND APPLIED IN CONJUNCTION WITH THE SAFETY RULES AND REGULATIONS APPLICABLE AT THE SITE AND THE PARTICULAR REQUIREMENTS FOR OPERATION OF OTHER EQUIPMENT AT THE SITE.**

**THESE INSTRUCTIONS DO NOT PURPORT TO COVER ALL DETAILS OR VARIATIONS IN EQUIPMENT NOR TO PROVIDE FOR EVERY POSSIBLE CONTINGENCY TO BE MET IN CONNECTION WITH INSTALLATION, OPERATION OR MAINTENANCE. SHOULD FURTHER INFORMATION BE DESIRED OR SHOULD PARTICULAR PROBLEMS ARISE WHICH ARE NOT COVERED SUFFICIENTLY FOR THE CUSTOMER/OPERATOR'S PURPOSES THE MATTER SHOULD BE REFERRED TO BAKER HUGHES.**

**THE RIGHTS, OBLIGATIONS AND LIABILITIES OF BAKER HUGHES AND THE CUSTOMER/OPERATOR ARE STRICTLY LIMITED TO THOSE EXPRESSLY PROVIDED IN THE CONTRACT RELATING TO THE SUPPLY OF THE EQUIPMENT. NO ADDITIONAL REPRESENTATIONS OR WARRANTIES BY BAKER HUGHES REGARDING THE EQUIPMENT OR ITS USE ARE GIVEN OR IMPLIED BY THE ISSUE OF THESE INSTRUCTIONS.**

**THESE INSTRUCTIONS ARE FURNISHED TO THE CUSTOMER/OPERATOR SOLELY TO ASSIST IN THE INSTALLATION, TESTING, OPERATION, AND/OR MAINTENANCE OF THE EQUIPMENT DESCRIBED. THIS DOCUMENT SHALL NOT BE REPRODUCED IN WHOLE OR IN PART WITHOUT THE WRITTEN APPROVAL OF BAKER HUGHES.**

# Bench Quick Start

The goal of this procedure is to perform a configuration of the SV II3 up to running Find Stops and Autotune on a bench. Additionally, this document also provides guidance on when to run signatures and produce associated reports. This procedure uses Baker Hughes' ValVue3™ software (ver. 3.60 or later) and the SVI3 DTM (ver. 3.10 or later).

## **WARNING**

*Changing the Application to Normal mode may move the valve. It may be dangerous if someone is still working with the valve.*

This procedure consists of the following major steps:

- “1. Physical Setup” on page 4
- “2. Software Install and Configuration” on page 6
- “3. Perform Setup Wizard” on page 11
- “4. Save Settings and Device Baseline” on page 12

# 1. Physical Setup

1. Buy a kit similar to the one shown in Figure 1. This kit contains a HART<sup>®</sup> Loop Calibrator (with wall power supply and loop test lead wires) and either a USB connector or a serial port connector for your laptop. The setup shown in Figure 1 is a GE product and can be purchased at:  
<https://www.gemeasurement.com/test-calibration/calibrators/ups-iii-loop-calibrator-ma-v>
2. Download and install software to use HART<sup>®</sup> loop on your PC. For example, MACTek<sup>®</sup> USB or RS232 software (Universal VIATOR Installer v3.1.9 with drivers for 32 bit Windows XP/Vista/7/8) available at software <https://www.mactekcorp.com/download.php>. When installed this software should the serial or USB port into which it is plugged. If it does not, the VIATOR installation includes a utility called *USB View* for viewing USB connections. For a serial connection, you can check using Windows Device Manager.
3. Prepare the HART<sup>®</sup> hardware by:
  - a. Plugging the HART<sup>®</sup> Loop Power Calibrator power supply in and setting up the calibrator as per its manual, ensuring the mode is correct to supply a 4 - 20 mA.
  - b. Plugging the USB plug or serial connector into the appropriate connector on the laptop/PC. Opening the cover on the SVI3 and connecting the other end of the USB/Serial connector to the 4 - 20 mA IN connections.
  - c. Connecting the loop calibrator cables to the 4 - 20 mA IN. Maintain polarity | + and -, respectively.

**Figure 1 Bench Setup Equipment**

4. Mount the SVI3 on the actuator per instructions in the SVI3 Quick Start Guide or Instruction Manual. These manuals are available for download at <https://valves.bakerhughes.com/resource-center>.
5. Pipe the SVI3 to the actuator. Ensure:
  - √ The airset provides the SVI3 with at least 5-10 psig more supply pressure than required by the actuator (maximum spring pressure):
    - Supply pressure for single acting SVI3:  
20 -100 psi (1.4 - 6.9 bar) (138 - 690 kPa)
    - Minimum tubing diameter 1/4" (6 mm x 4 mm)
  - √ Any other pneumatic accessories are correctly piped without restricting the SVI3 output(s) to the actuator.

## 2. Software Install and Configuration

1. Download the ValVue and DTM software and install. See “Masoneilan Software” on page 13 for download site.
2. Download the Codewrights HART® Communication DTM and install. See “Code wrights HART® Communication DTM” on page 14 for download site.
3. Sign on to ValVue3 with default values:
  - √ User name *admin*.
  - √ Password *ValVue3*.

### NOTE

*For security purposes, you are forced to change your password during the first use.*

*The ValVue and SVI3 DTM license trial period works as follows:*

1. *Once you download and install the ValVue software, you are granted a 30 day trial period. During the 30 days, you have access to all the advanced features of ValVue and the SVI3 DTM.*
2. *Once the first 30 days expires, you lose the advanced features of both ValVue and the SVI3 DTM. You then have an additional 30 day period with just standard features, after which you must register to continue using the product. We strongly encourage you to register your license with us as soon as possible. Contact Baker Hughes at [software.reg@ge.com](mailto:software.reg@ge.com).*

*The evaluation periods for both are independent of each other and commence with first use.*

**NOTE**

If you have updated ValVue, a dialog appears when you open ValVue3:

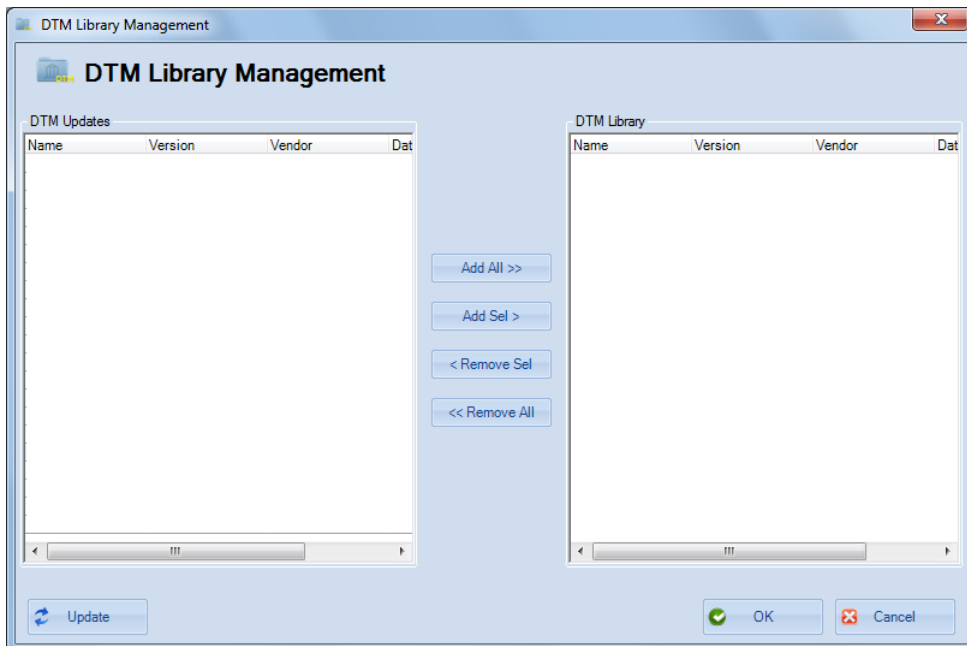

Click:

✓ **Yes** and the library is updated.

✓ **No** and you need to manually updated from the DTM Library Management dialog to access any new functionality.

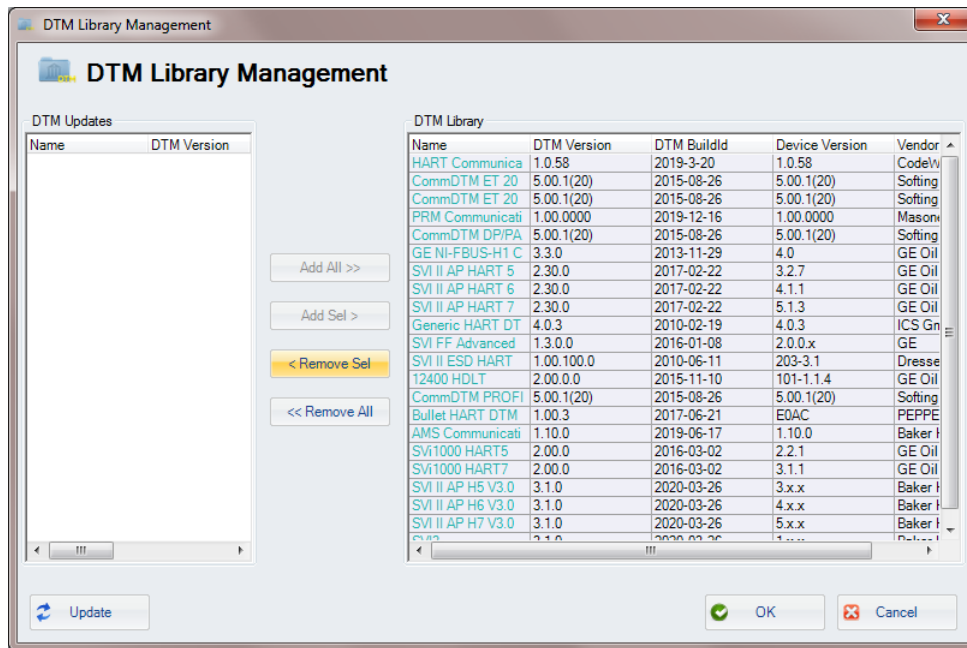

4. Click **Settings > DTM Library** and Figure 2 appears.

**Figure 2 DTM Library Management: Before Update**

5. Click **Update** and once the *DTM Updates* list refreshes, select the **HART Communications** and the **SVI3**.

- Click **Add Sel** and then click **OK** to close *DTM Library Management* dialog.

**Figure 3 DTM Library Management: After Update**

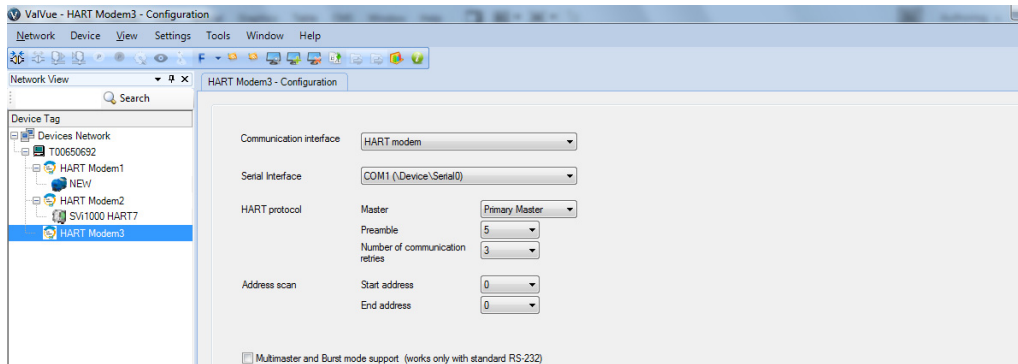

- Click **Settings > Field Networks**, click **Add** and Figure 4 appears. Select **HART Modem** and click **OK**.

**Figure 4 Add Field Network**

8. Click **OK** again to add the *HART Modem* to *Network View* and Figure 5 appears.

**Figure 5 HART Modem Configuration Tab**

9. Ensure the *Serial Interface* pulldown and the *Address scan* fields are correct. Click **Apply** and then **OK**.

**NOTE**

*If device is connected (or powered through DCS), set Master to Secondary Master.*

10. Right-click on the **HART Modem** and do one of the following:

✓ Selecting **Network > Rebuild Network**.

or

✓ Selecting **Open Connected**

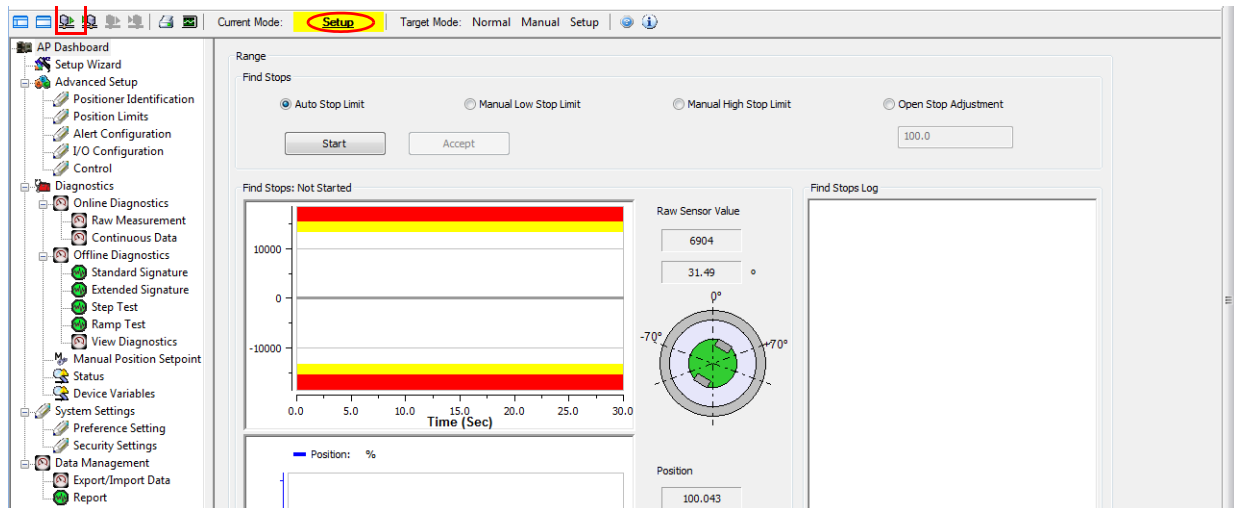

or

✓ Clicking **Add New Device**, Figure 6 appears, highlighting **SVI3** and clicking **OK**.

**Figure 6 Add New Device**

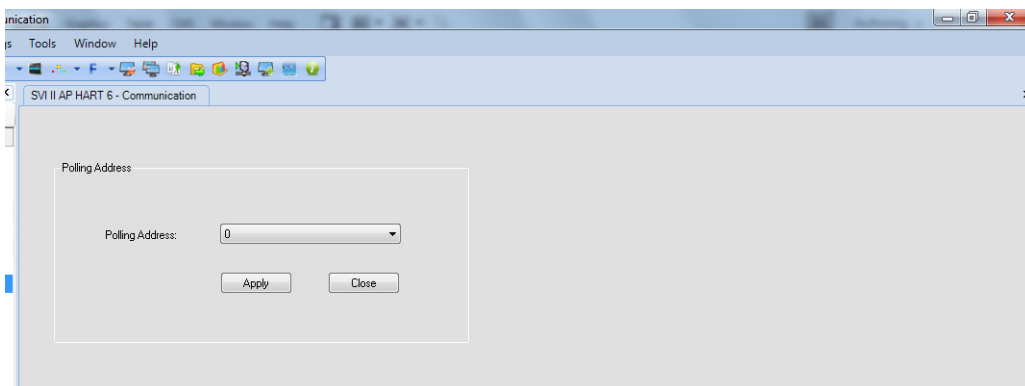

11. Right-click on the SVI3 in the *Project* pane and click **Connect**.
12. Click **OK** to the DTM evaluation period warning, if it appears. The SVI3 DTM opens. If the SVI3 DTM doesn't open automatically: Select the SVI3 device you added, right-click and select **Online Parameter**.
13. Check that the SV3 is connected (see red oval in Figure 7).

**Figure 7 Connected**

If not it does not connect:

- ✓ Right-click on the device in the topology pane, select **Additional Functions > DTM Address** and Figure 8 appears. Correct the *Polling Address* and click **Apply**. Disconnect and then reconnect.

**Figure 8 Communication Tab**

14. Click **Upload All Parameters** icon (see red box in Figure 7).

**NOTE**

*Upload means to pull data from the SVI3 and load data into DTM onto the PC. Download puts data from the DTM into the SVI3.*

### 3. Perform Setup Wizard

Use the *Setup Wizard* to configure the basic setup for the SVI3 (Figure 9).

**WARNING**

*This procedure moves the valve.*

*Before beginning, confirm that the valve is isolated from the process. This procedure exhausts and then fills the valve actuator to supply pressure and therefore strokes the valve over its full range.*

*Supply pressure **MUST NOT** exceed the actuator pressure rating marked on the actuator. Positioner supply pressure **MUST BE** at least 5 psi higher than the upper spring range of the valve.*

**CAUTION**

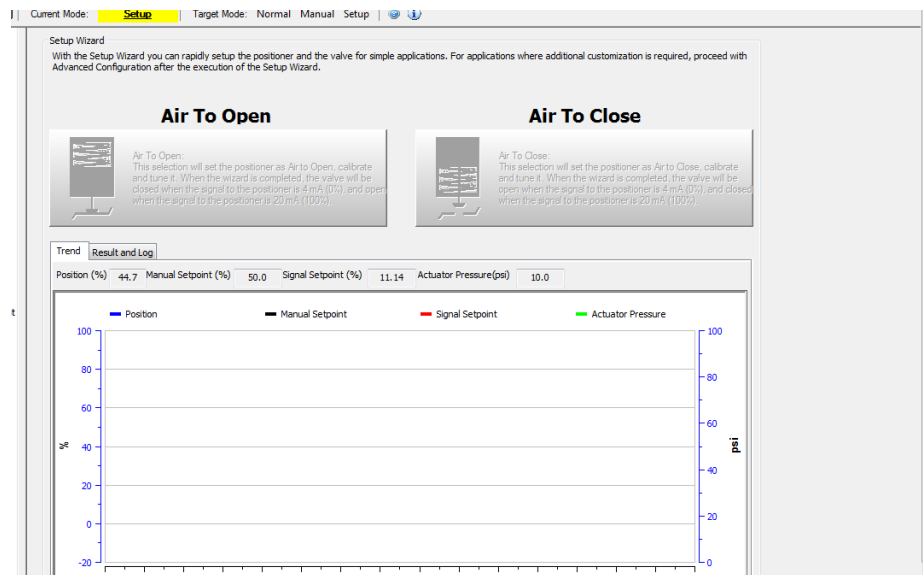

*Procedures (e.g. Find Stops, Auto Tune, Step Test, Ramp Test, Signature) should **NOT be** invoked if the ValVue sequencer is running. For information on the sequencer, see ValVue 3's online help.*

*Do not Auto Tune if manual tuning has been used. Auto Tune creates new parameters that override the manual tuning parameters.*

*For a successful Auto Tune process, the supply pressure must be at least 5 PSI (34.5 kPa) above the spring range.*

1. Select the **Setup Wizard** tab and ensure the mode is in *Setup*.

**Figure 9 Setup Wizard Tab**

2. Click either **Air To Open** or **Air To Close**, as appropriate.

## 4. Save Settings and Device Baseline

1. Perform any needed diagnostic tests and run tests. See the SVI3 DTM online help for steps to configure and run diagnostic tests. Save the results.
2. After finishing with the control valve, make sure all saved reports contain all necessary order information, by:
  - a. Selecting **Diagnostics > Offline Diagnostics > Report** and the report appears.

The screenshot shows a web browser window displaying the 'SVI3 Report' from Baker Hughes. The report is titled 'Smart Valve Interface Results' and contains the following data:

General Information					
Device Tag	SVI TAG	Device S/N	9042009	Device ID	9042009
Long Tag	SVI POSITIONER LONG TAG		Model Code	Seelabel on positioner	
Dev. Type/Rev	65AA / 01	Polling Address	0	Date	6/19/2009
Diagnostics Level	Valve Health Predictor		DTM Rev	3.1.0 Build 032620	
Descriptor	Descriptor		Firmware Rev	1.x.x	
Message	Message				
Positioner Hardware Information					
Module Name	Serial Number		Firmware Revision	Hardware Revision	
Pneumatics Module	NA		NA	NA	
Option Module	NA		NA	NA	
User Interface Module	NA		NA	NA	
Configuration Information					
Input Signal Range	Lower	4.00 mA	PosRetransmit	Lower	0.00 %
	Higher	20.00 mA		Higher	100.00 %
Position Error	On	Error Band	2.00 %	Deviation Time	3.00 Sec
User Interface	Language	English		Pressure Unit	psi
	Button Lock Level	Allow Local Buttons		Digital Input	On
Position Sensor	Internal Position Sensor				

Figure 10 Example Report

### NOTE

Use the icon bar on the top of the report to export this to a Word or pdf file, which can be printed or saved.

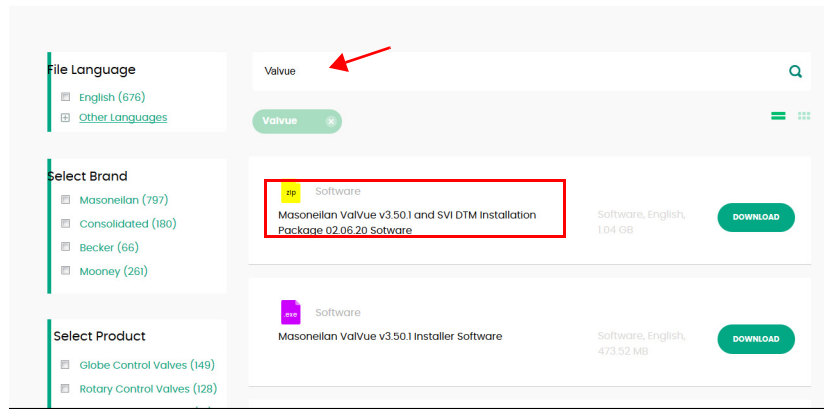

- b. Clicking the *Disconnect* icon  on the ValVue 3 toolbar.
  - c. Clicking **Network > Exit** to close the DTM. If you have unsaved data, click the *Download Parameters to Device* icon  to save.
3. Connect the SVI3 wires to next item on order. Click **Import and Add New**. Go to step 4 of “2. Software Install and Configuration” on page 6 and repeat.

# Appendix A: Download Instructions

## Masoneilan Software

### Download and Install ValVue3 DTMs

1. Go to the *Resource Library* (<https://valves.bakerhughes.com/resource-center>) and enter *ValVue* in the search field (arrow in Figure 11).

**Figure 11 Resource Center: Search for Valve 3**

The results appear (red box in Figure 11).

2. Use the arrows to move through the selections. Select **Download** below the installer and Figure 12 appears.

**Figure 12 Opening Dialog**

#### NOTE

*The dialog that appears for download varies by the program used.*

3. Click **Save File**, click **OK** and it saves to the *Windows Downloads* folder.

For fastest installation, save the download file to your laptop/PC. *Don't install from the website.*

4. Open *Windows Explorer* and click the **Windows Downloads** folder.

*If you are upgrading from ValVue 2.x you must update the SQL database location to match ValVue3's.*

5. Double-click on the installer and follow the instructions to install.

### **Code wrights HART<sup>®</sup> Communication DTM**

You must download and install this DTM to use Masoneilan's HART<sup>®</sup>-based DTM.

Go to the link: <http://www.codewrights.biz/index.php/en/downloads/software> and follow instructions to download and install the CW\_CommDTM\_HART.

*This page intentionally left blank.*
